Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species I: figures 2-4

Species II: figures 6-9

Species III: figures 10-11, 14-17

Species IV: figures 12A-12C

Species V: figures 13A-13C

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant's election without traverse of Species III, figures 14-17, in the reply filed on 1 November 2006 is acknowledged. Claims 1 and 2 read upon the elected species.

The restriction requirement is hereby made **FINAL**.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Rizzuto (WO 02/058504).

Rizzuto discloses a device comprising a first body member and a second body member. The first and second body members include gripping portions 18. Hinge means 10 pivotally connect the body members. The device further includes biasing means 26 for biasing the first and second members into a predetermined position. The hinge means includes male 20,22 and female 24 members of substantially cylindrical shape which enclose the biasing means.
